

OpenClovis Helps Telecom Equipment Developers Build Next-Generation Systems Using Open Source

Experts Explain How to Save Time and Reduce Risk, While Lowering Cost and Speeding Products to Market

PETALUMA, Calif. – Sept. 5, 2006 – OpenClovis Inc., provider of the premier open source, commercial-off-the-shelf (COTS) application service platform for the telecommunications industry, today announced it will present a series of one-hour Webinars to demonstrate open source-based solutions that will allow developers to speed time to market and reduce engineering risk. “**Node Manageability**” will be the next upcoming presentation in the series of free Webinars that will run monthly through November 2006.

This first online Webinar, scheduled for **Tuesday, Sept. 12, 2006**, at 11 a.m. PDT, is for architects, engineers and others designing next-generation telecommunications systems. In this presentation, OpenClovis will demonstrate how to use Commercial-off-the-Shelf (COTS) applications to leverage device manageability, how to store device information in an object repository and provide a consistent northbound interface, and how to automate code generation and information modeling with the OpenClovis Integrated Development Environment (IDE).

Future Webinar topics will include:

- Migrating Legacy Systems & Applications to AdvancedTCA COTS Based Hardware Platforms Using OpenClovis (October 10)
- High Availability: How OpenClovis Does It (November 7)

About OpenClovis

OpenClovis (www.openclovis.com) provides the premier open source, commercial-off-the-shelf application service platform for the telecommunications industry. The company reduces the cost of developing telecommunications equipment and accelerates time to market by providing developers with a flexible, standards-based software platform available under both open source and commercial licenses. With OpenClovis, telecommunication and network equipment manufacturers can quickly and easily add a management and high availability platform, on which to build their differentiated applications. OpenClovis has received investment backing from American River Ventures, AT&T, Intel, Sevin Rosen Funds and Walden International. The company has partnerships with industry leaders such as HP and IBM.
